

# eWalk®

eWalk is an easy to use web-based, handheld application for mobile observations, data aggregation, and reporting.

eWalk is a tool used by principals, curriculum specialists, and other administrative staff to collect and analyze data using a handheld device such as an iPhone or an iPad. Templates allow users to gather data on any area from instructional practices in the classroom to wait time in the cafeteria.

## eWalk Features

- Create mobile observations with instant data aggregation and advanced reporting.
- Includes free offline clients for iPad, Android, Kindle Fire, and Mac/Windows laptops
- Create simple to complex data collection templates for observations and surveys with the powerful authoring system, or use shared templates.
- Share data collection templates with entire district or individual schools/users
- Offers over 15 questions types (including rubrics, checklists, drop-downs, and a selection of pre-built counters and timers)
- Update and aggregate built-in graphing, charting, and dashboards instantly.
- Export data collected as .CSV Excel files.
- Save or email completed observations in PDF or HTML formats.
- Attach photos as part of an observation, or attach PDF or files.
